

New Move in Software Testing

Proactive Innovation Trusted Partner

The quality, speed and accuracy of testing underpins your ability to develop the great software you need to conduct your business with confidence. As sensors, phones, tablets, and other smart devices increasingly impact operations and customer relationships, agile and highly-automated testing is a must. Technology Development Group offers a complete portfolio of testing services for your enterprise. Our expertise includes market-specific testing solutions & distributed delivery ...

PERFORMANCE TESTING

tTesting, Speed is the most important attributes of an application.

tTesting protects your client to leave your app. It gives the most advanced level of load testing, stress testing, endurance testing, volume testing and scalability testing.

SECURITY TESTING

tTesting, analyzes how code is written and how it interacts with other objects in an environment to identify weaknesses or flaws that would allow an attacker to gain unauthorized access to systems, databases, or account privileges they should not have.

Penetration test, vulnerability assessment, code review are some features of **tTesting**.

TEST AUTOMATION

tTesting, provides functional & regression test automation for every major software app and environment, including Web 2.0 toolkits, leading dev. technology, Web, REST, and SOA service, ERP, and CRM systems.

FUNCTIONAL / UNIT TESTING

tTesting, focuses on the various internal systems of the applications. He ensures that the parts of the application will work correctly and safely, that is, meet the building code.

Also, **tTesting** focuses on what it will be like to live in this application. How the system looks, is it comfortable size, does the application fit the needs etc.

TEST DATA MANAGEMENT

tTesting, helps to automate the identification of sensitive data locations for consistent masking within and across databases.

tTesting, helps to provision smaller datasets based on test plan requirements. And it minimizes the infrastructure requirements and speed performance.

TEST ADVISORY

tTesting, through digital transformation we strive to create the firm of tomorrow. And **tTesting** use the TMMI (Test Maturity Model Integration) based assessment and assess current test organization and map it to the model. **tTesting** experts help you by identifying gaps and improvement areas. The roadmap is defined for prioritized items to be
